

# Part 1: COVID 19 - FROM A CANADIAN METEORITE TO WUHAN CHINA

**Craig Ebrahimi found the first possibly virus-infected meteorite on March 1, 2018 in waters off Sooke, Canada.**

**He first took it to the University of Victoria where it was studied by Dr. Elaine Humphrey.**

**It was often stored in a vacuum, but handled by people at UVic.**

**There is a daily ferry (Victoria Clipper) that connects Victoria to Seattle. The first major U.S. outbreak was in a suburb of Seattle where at least 22 people died at the Life Care Center of Kirkland.**

**By Barry S. Roffman, Lieutenant, USCGR-Ret  
April 23, 2020**

# Dr. Elaine Humphrey at the University of Victoria was the first scientist to examine the meteorites.

## Dr. Elaine Humphrey

### Position

#### *Project manager*

Department of Mechanical Engineering

### Credentials

BSc (UCNW), MSc (Southampton), PhD (Southampton)

### Contact

Office: BWC A007/A015

✉ [ech@uvic.ca](mailto:ech@uvic.ca)

☎ [+1 250 853 3968](tel:+12508533968)

## Experience

Dr. Humphrey began work at the University of Victoria on March 1, 2009 as the laboratory lab manager and STEHM technologist for the new Advanced Microscopy Facility. This position entailed building a world-class microscopy facility with responsibility for all aspects of running the lab.

**Craig Ebrahimi also shipped a meteorite sample to Professor Wickramasinghe at the University of Buckingham in the U.K. on June 18, 2018.**

**Priority Worldwide** **Priorité Mondial**

### Abstract

Over the past several months influenza activity has continued to increase in the temperate zones of the northern hemisphere and has led to a concern over global health and the impending prospect of another major pandemic. Based on a range of available evidence we argue that the current influenza situation might be related to the ongoing La Niña phenomenon accompanied by increased precipitation patterns in the Pacific. The four most recent human influenza pandemics (1918, 1957, 1968, and 2009) were preceded by La Niña conditions in the equatorial Pacific and almost all influenza pandemics in history fall within  $\pm 1$  year of sunspot extreme. Sunspot activity will reach its minimum in 2019. Therefore, a new influenza pandemic may well be imminent now, one hundred years after the 1918-1919 pandemic. It will therefore be prudent and timely to strengthen worldwide surveillance strategies and to prepare ourselves for a future emergency.

Humphrey waits until May 2019 to ask Wickramasinghe about Craig's rocks.

From: Elaine Humphrey <ech@uvic.ca>

Date: May 17, 2019, 00:13

To: Chandra Wickramasinghe <ncwick@gmail.com>

Subject: meteorite

Hi Chandra,

I have a client, Craig Ebrahimi, who brought in a meteorite. At first it looked like gabbro but the chemical analysis (by Act labs) proved to be a meteorite. I understand that **he sent you thin samples, outside crust, a piece of the rock with a embryo in a white circle**. I have a very small sample for sem and eds. Craig suggested that if you have finished with his samples, is it possible that you send them to me. Since I will be in the UK at the end of June for a month, I could pick them up.

Best wishes

Elaine

Dr. Elaine C. Humphrey

Fellow of Microscopy Society of America

Past President Microscopical Society of Canada

# May 20, 2019: Wickramasinghe claims Craig's meteorite was stolen

Dear Elaine

Unfortunately, the meteorite package was left in a shed near our house and it appears to have been stolen. I do not have it anymore.

Sorry about this

Sincerely

Chandra

Abstract

In fact, new viral infections are predictable. In a letter entitled with "Space weather and pandemic warnings?" to *Current Science* published in **November 2019**, we explicitly reminded the world that new infective viruses are likely to emerge in the coming months during the lowest minimum of the sunspot cycle in over a hundred years, and that public health authorities must be vigilant and take necessary action<sup>6</sup>. The emergence of the 2019 Novel Coronavirus, in our view, confirms this prediction and highlights the urgency of taking appropriate precautions without further prevarication.

# First contact by Ebrahimi to Roffman

**subject:** Fw: Extraterrestrial embryo discovered in meteorite UVIC BC.

**My name Craig Ebrahimi research scientist/ Founder Deviant off world technology**

**Barry would you be interested in the research and biotechnology opportunity/of the only pristine extraterrestrial embryo on the planet at the University of Victoria BC.**

# PAR Eidolia OR A REAL EMBRYO?

- Pareidolia is the tendency to perceive a specific, often meaningful image in a random or ambiguous visual pattern.
- The Ebrahimi meteorite poses two potential threats. One is that it may be the source of COVID-19
- The second threat is that if not an example of pareidolia, it is touted as having multiple alien embryos. Even if not the source of COVID-19, it may still constitute a bio-hazard.

# 1 0 PAREIDOLIA OR A REAL FACES?

*Dr. Humphrey said, “All the grains of rock have faces in them. It’s fascinating, but I’m telling you it’s an illusion. It’s still an interesting rock, and the more we look at it, the more interesting it gets.”*

# Faces in the Meteorite

Craig Ebrahimi found a special rock when diving underwater.

With a diamond saw, he took off the end to use for analysis and polished the face of the rock.

In order to prove it was a meteorite, he sent a sample to the prestigious Actlabs for analysis and it came back supporting that it is a meteorite. The oxygen isotopes came back as lunar origin.

It is a weird rock: the surface face takes heat away and is so cold, water condenses onto it; even after the rock has been in room temperature for months. 

Looking closely with a hand lens, there are a surprising number of different faces in the grains of the rock.

# PAREIDOLIA?

**On 2/13/2020 Dr. Humphrey also told me that the explanation for the faces and embryos was pareidolia, but the earlier e-mail between her and Professor Chandra Wickramasinghe on 5/17/2019 only refers to an embryo.**

# **COULD THERE BE COMMERCIAL OR MILITARY REASONS FOR WICKRAMASINGHE TO LIE ABOUT THE THEFT OF CRAIG'S METEORITE?**

**YES – Having the original virus in pristine state makes it easier to produce effective cures worth billions of dollars. Think \$\$\$\$\$\$\$\$\$\$\$\$\$\$!**

**The disease could be used to cripple our Pacific Fleet. Wickramasinghe's native Sri Lanka buys all its weapons from China. China train's Sri Lanka's military officers like those at General Sir John Kotelawala Defence University. That university gave him an honorary doctorate.**

# DURING THE 2020 PANDEMIC WICKRAMASINGHE TELLS CRAIG HE HAS THE CURE FROM SPACE

There are 149,681 characters between rows. The wrapped matrix starts at Genesis 6:3.21 and ends at Exodus 9:32.1. It spans 3,742,070 characters of surface text. The matrix has 26 rows, 45 columns and 1170 characters.

According to Johnson's biographer, Andrew Gimson, regarding ancient Greek and Roman polytheism:  
"it is clear that [Johnson] is inspired by the Romans, and even more by the Greeks, and repelled by the early Christians"  
Johnson views secular humanism positively and sees it as owing more to the classical world than Christian thinking.

UK PM Boris Johnson Compares Brexit to Tortures of Greek Hero

# Life in space extends beyond viruses. These are puffballs (fungi) growing on Mars.

Sol 1145-left v Sol 1148-right). Comparing Sol 1145-left vs Sol 1148-right. Growth of fifteen Martian specimens over three days. Specimens labeled 1-5 and marked with red circles have increased in size. Those specified by arrows-Sol 1148-right-demarcate the emergence of ten new specimens which were not visible in Sol 1145-left photographed three days earlier by NASA/JPL. Differences in photo quality are secondary to changes in camera-closeup-focus by NASA. The majority of experts in fungi, lichens, geomorphology, and mineralogy agreed these are likely living specimens, i.e. fungi, puffballs. A **DISPROVED** alternate explanation is a strong wind uncovered hematite which had been buried beneath sand and dirt.

**Photos taken by M.E.R. Opportunity. They were included as Figure 8 in *Evidence of Life on Mars?* by Joseph, Rhawn & Dass, Regina & Rizzo, Vincenzo & Cantasano, Nicola & Bianciardi, Giorgio. (Journal Of Astrobiology, 2019).**
